AGILITY QUADRICEP

THE PANEL

12" × 12". 4.78 pounds. IP67. And it bends in your hands — in more than one direction at once.

One panel, twisted — flexible in multiple directions at the same time.

Bends backward and forward

3.8" profile · PowerCON / EtherCON

The face: LED modules, magnetic mount

DAISY-CHAIN POWER & DATA · MAGNETIC MOUNT · 5-YEAR WARRANTY

WUNDERART.US

AGILITY FAMILY

QUADRICEP × BICEP

One platform, two sizes — shown at true relative scale. They tile together, seamlessly.

true relative scale →

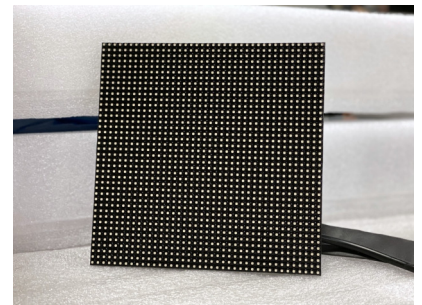

QUADRICEP

12" × 12" · 4.78 lbs · 3.8" deep · integrated receiving box

BEHIND THE PIXELS

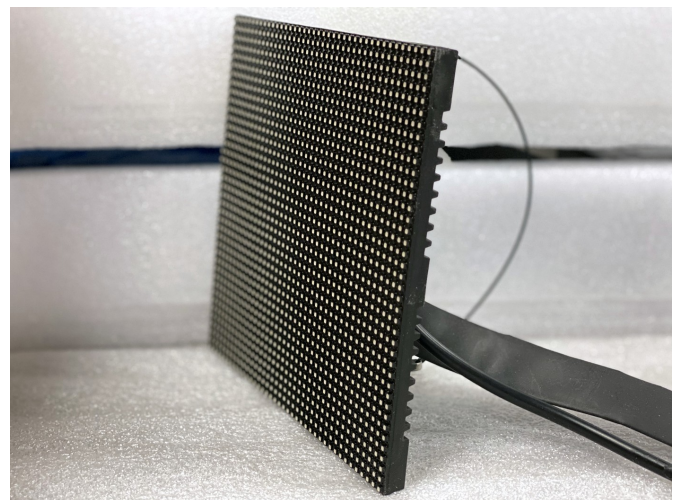

Quadricep rear — integrated power & receiving, daisy-chain in/out

BICEP

6" × 6" · 2.0 lbs · 0.75" thin · off-cabinet box

Bicep profile — 0.75" thin, box rides off-cabinet

SAME PITCHES P1.2-P10 · SAME BULBS & CHIPS · FOUR BICEPS = ONE QUADRICEP

Mix freely in one array — the Bicep fills gaps and finishes shapes the big panel can't reach.

WUNDERART.US

ONE PANEL. ANY SHAPE.

A DJ is performing on a rooftop stage, illuminated by warm stage lights. The DJ is wearing a black jacket with yellow accents and yellow shoes. A camera operator is visible on the left, filming the performance. The background features a city skyline with prominent skyscrapers, including the Empire State Building, under a cloudy sky. The stage has a green LED border with the letters 'PIT' visible on the left side.

IF YOU CAN SKETCH IT, AGILITY CAN BECOME IT
